(54) DATA SERVING SYSTEM

(57)Abstract:

PURPOSE: To easily obtain more detailed information of an article of newspaper.

CONSTITUTION: Newspaper data are sent via a satellite 4 from a press company and received by a data receiver 6. The received data are recorded on a magneto-optical disk (MO) 8 and read as required therefrom and displayed on a monitor 7. Then more detailed information (detailed information) of displayed data (newspaper article) are reported as to whether or not the detailed information is in existence in a large sized computer 1 of a newspaper press company. When the detailed information is in existence and a command requesting the detailed information is made by operating a remote controller 9, the detailed information is sent to a data receiver 6 via a public telephone network from the large sized computer 1.

LEGAL STATUS

[Date of request for examination] 23.07.2001

[Date of sending the examiner's decision of rejection] 14.03.2002

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

BEST AVAILABLE COPY

[Number of appeal against examiner's decision of rejection] 2002-06399

[Date of requesting appeal against examiner's decision of rejection] 15. 04. 2002

[Date of extinction of right]
